

# 7000 Series Microscope

Innovative design, durability and superior optics are the trademarks of the 7000 series. These instruments are equipped with a full line of accessories that make them ideal for educational and medical laboratories.

## Features:

- Choice of binocular or trinocular head, both rotating 360° and have a 30° inclination
- Infinity corrected objectives provide more depth and greater flatness with edge sharpness for additional clarity and contrast.
- NOTE: Infinity corrected optics are **not** interchangeable with DIN optics.
- 5 position reverse nosepiece provides user with more room for specimen manipulation
- Objectives rotate into place with precise click-stop action
- Mechanical stage is a double plate flat top with right-handed pendent drop coaxial controls
- 1.25 N.A. Condenser substage with iris diaphragm; Comes with blue filter
- Fitted with Koehler illumination system for 6v20w halogen, which enhances the optical performance
- Variable light intensity control is positioned near the focusing knob
- Comes complete with dust cover and instruction manual
- Shipping information: 18" x 16" x 12"-20lbs

Product No.	head	DIN Objectives	Illumination
7008	Binocular	4x,10x,40xR,100xR	6v20w Halogen
7010	Trinocular	4x,10x,40xR,100xR	6v20w Halogen
7008P	Binocular	4x,10x,40xR,100xR	6v20w Halogen
7010P	Trinocular	4x,10x,40xR,100xR	6v20w Halogen
7008PPC	Binocular	10x,40xR,100xR	6v20w Halogen
7010PPC	Trinocular	10x,40xR,100xR	6v20w Halogen
7008PIC	Binocular	4x,10x,40xR,100xR	6v20w Halogen

P=Planachromatic    PPC=Planachromatic Phase Contrast    PIC=Plan Infinity Optics
